

Wax Trimmer

Wax Trimmer

Features:

- Multiple blocks may be trimmed simultaneously
- Grooved surface for wax drainage
- Temperature settings in single increments from Low 30°C (86°F) to High 80°C (176°F)
- Includes drip tray

The Wax Trimmer has been designed to cleanly and efficiently remove excess paraffin from embedding tissue cassettes.

The Wax Trimmer can be used with all sizes of biopsy cassettes.

The grooved, heated surface channels melted wax into a removable collection tray.

The heat settings can be increased or decreased in single increments from Low 30°C (86°F) to High 80°C (176°F)

The temperature controls have been intelligently positioned under the laminate fascia to prevent wax ingress into control switches.

Dimensions: L23 x W12.5 x H16 cm

Wax Trimmer

The Wax Trimmer is a professional instrument for the removal of paraffin from embedding tissue slides.

Specifications:

Heat settings in single 1° increments from 30°C (86°F) to 80°C (176°F)

Input power connector: IEC

Voltage: Selectable 220-230 / 110 50-60 Hz

Power: 100 VA

Dimensions

WT500 dimensions: L23 x W12.5 x H16 cm

Weight: 3.7 Kg

EMC compliance: EN61000 - 6-2/6-3 EN61000 - 4-11/4-4/4-4FTB/4-2/4-5

Complies with all aspects of the EEC requirements of directive No. 2004/108/EC
